Beware of Elon Musk Deepfake Crypto Scams which are being promoted on YouTube.

Do not fall for such scams. @elonmusk will never ask you to send any crypto.

Generally shared across platforms with compression, thereby causing low quality variations.

What are we contributing?

Benchmark Settings

Deepfake detection models:

- MesoNet [1]
- Meso-Inception [2]
- FWA [3]
- Xception [4]
- DSP-FWA [5]
- Capsule [6]

Evaluation Metrics:

- ROC-AUC score
- Face-wise Accuracy
- Frame-level Accuracy
- Video-level Accuracy

Benchmark Experiments

- **Protocol 1**- Single-face Deepfake Detection
- **Protocol 2**- Multi-face Deepfake Detection
- **Protocol 3**- Cross-Resolution and Cross-Compression Deepfake Detection

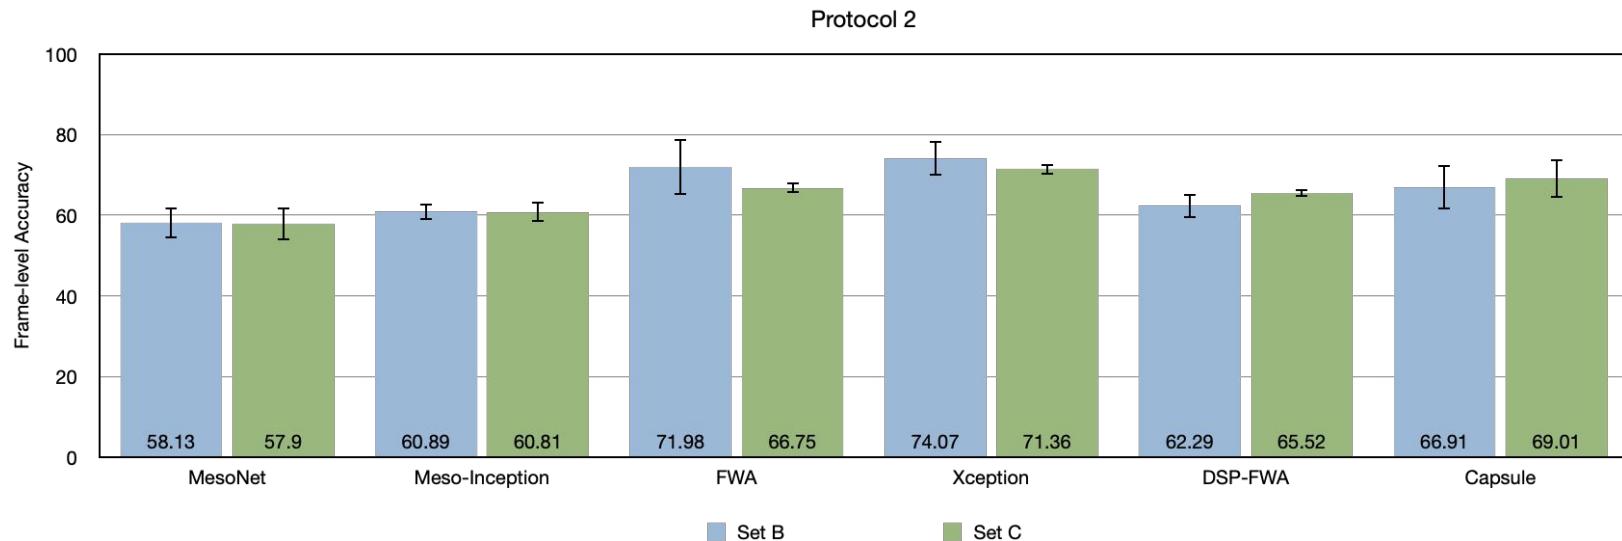

Benchmark Results: Protocol 1

- Trained on Set A (c0, HR), Tested on Set A (c0, HR)

Benchmark Results: Protocol 2

- Trained on Set A (c0, HR), Tested on Sets B and C (c0, HR)

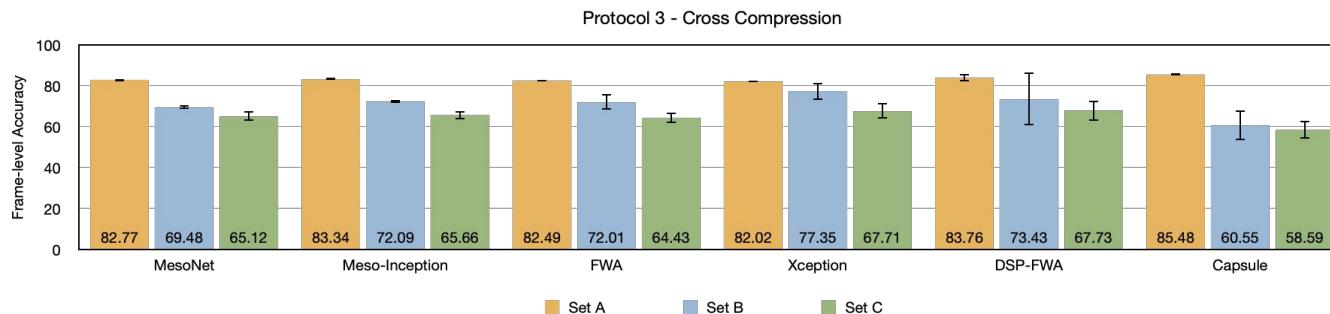

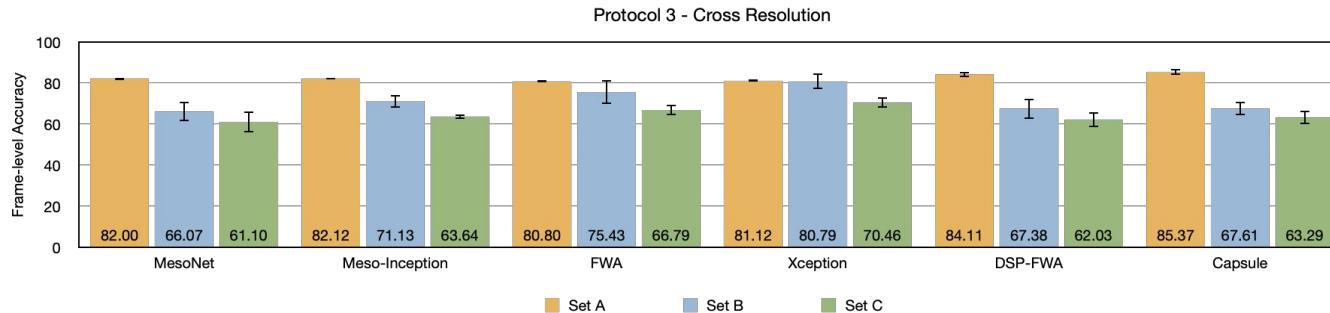

Benchmark Results: Protocol 2

Benchmark Results: Protocol 3

- Cross-resolution - Trained on Set A (c0, HR), Tested on all Sets (c0, LR)
- Cross-compression - Trained on Set A (c23, HR), Tested on all Sets (c40, HR)

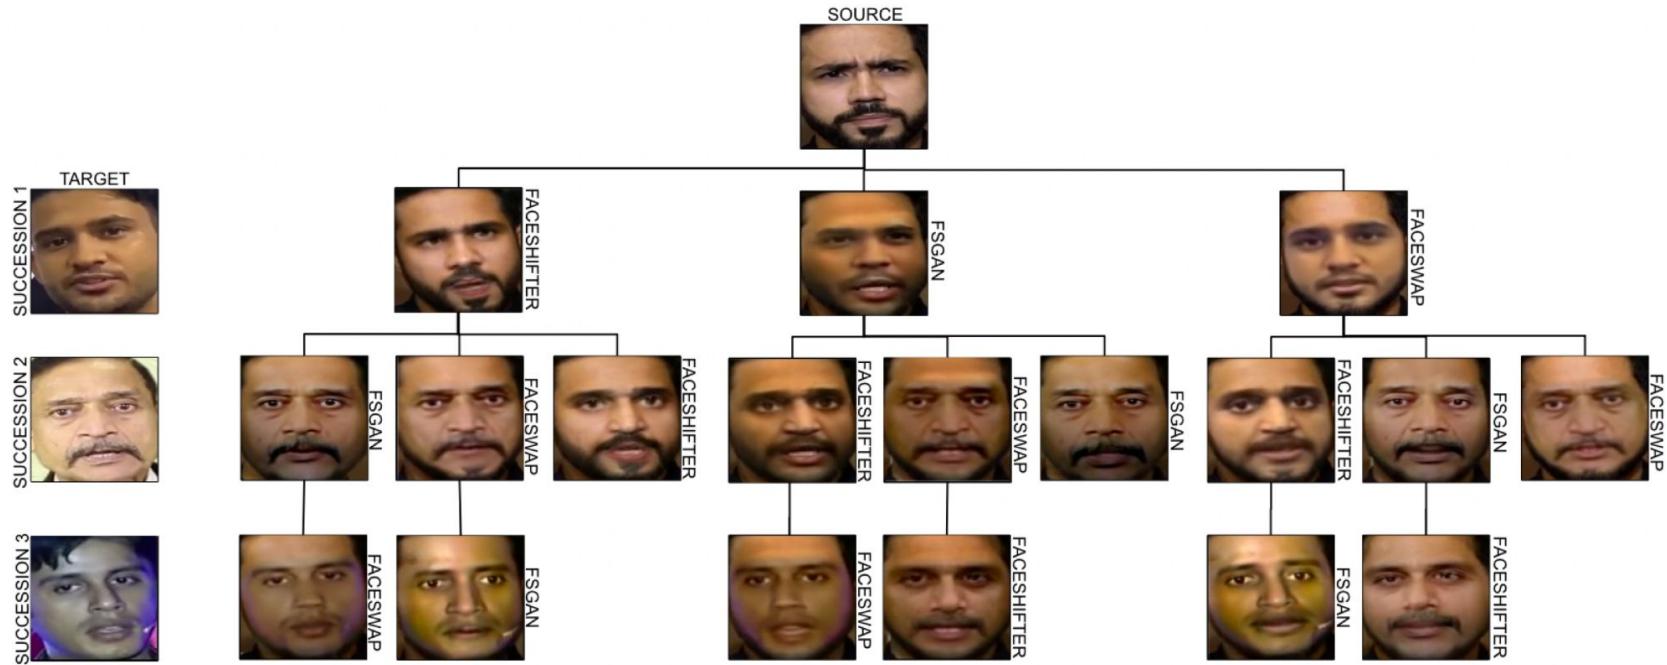

Benchmark Results: Protocol 3

Observations and Path Forward

- We introduce the large-scale DF-Platter dataset containing multi-face and low-resolution deepfakes with rich annotations for each video allowing for a thorough analysis of deepfake detection methods
- Our key observations are:
 - Existing detectors perform poorly towards detecting deepfakes containing multiple faces.
 - Existing detectors are not equipped to handle real-world detection scenarios of occlusion, compression and resolution.
- The proposed dataset will enable developing deepfake detectors in challenging environments

Path Forward...

Thank you.
